Which product to use.

The noise cancelling performance is the same for all our products. Our range of products are designed to be used in a wide variety of applications. This document gives an overview of where they are installed. For more information on a specific product, see our website for datasheets.

External Installations:

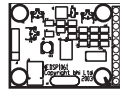

Using an existing extension loudspeaker.
Where an external loudspeaker is being used there are 2 external solutions.

Internal Installations:

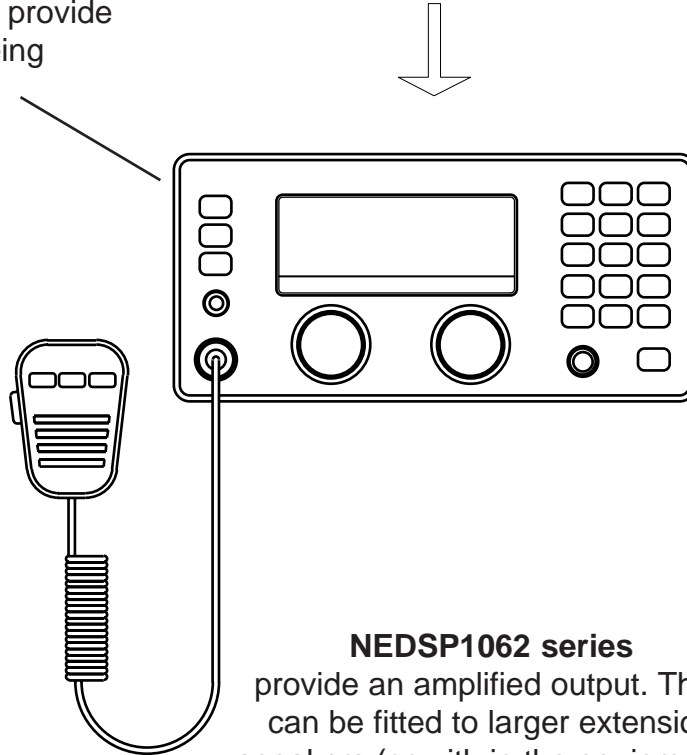

The NEDSP pcb modules are designed to be installed within the equipment (subject to space). Two versions are available,

NESP1061 series
for use in low power signal
applications

Can be installed in the
microphone path to provide
clean audio being
transmitted

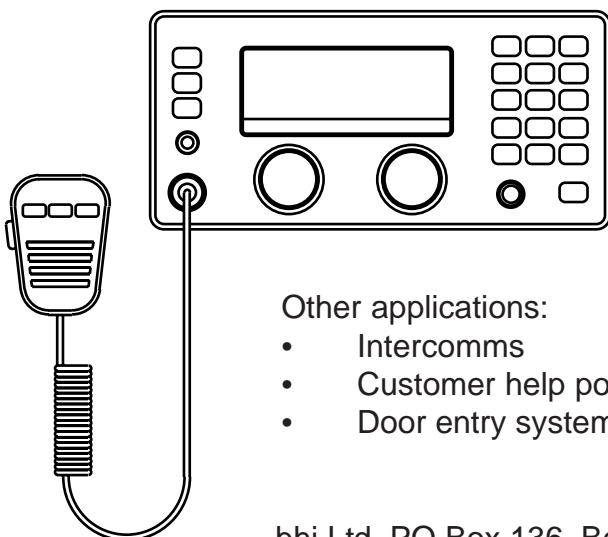

Can be installed in the audio
path to provide clean re-
ceived audio

NEDSP1062 series
provide an amplified output. They
can be fitted to larger extension
speakers (or with in the equipment -
subject to space).

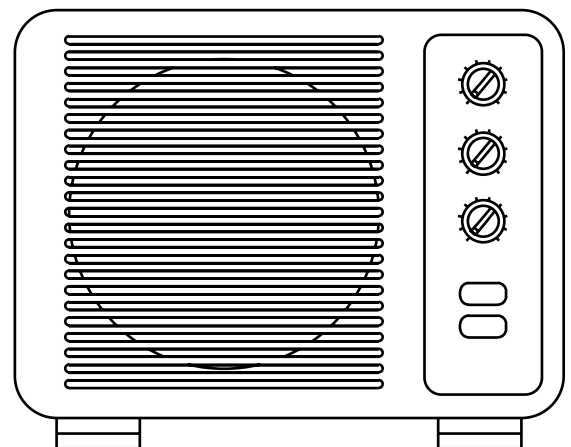

Audio source

Other applications:

- Intercomms
- Customer help points
- Door entry systems
